Proceeds: Will go to support breast cancer treatment and screening by purchasing these two important pieces of equipment: **Breast Imaging Specimen Radiography System** – Used in the OR to give precise image quality on the edge of the breast tissue specimens, so physicians are less likely to miss something and need to redo the procedure. **Pristina Dueta** – Reduces mammogram anxiety by allowing the patient to manage a control that regulates the amount of breast compression. Both will benefit so many in the Greater Lodi community.
